H2(P) Quick Start Guide

| Connection	Function Keys

Change Language: English by default. Phone UI change path: Setting -> Phone -> Language.

1. Configuring network

Dynamic mode by default.

Phone UI change path: Setting --> Admin (Default password: 123456) --> IP Param --> IP Config --> IPv4 settings.
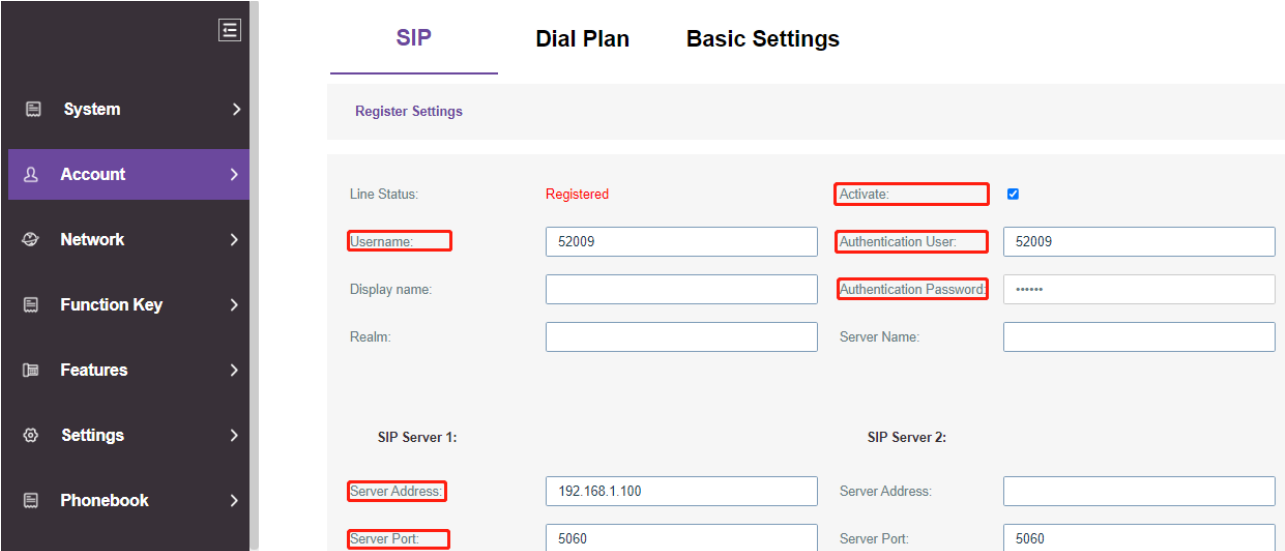

2. Configuring account

Users can configure account via phone UI or WEB UI. WEB UI example.

Step 1: Pressing "OK" key to view the IP address

Step 2: Entering https://IP address on the browser. Login with "admin" and password "123456"

Step 3: Configuring account as below

Note: Marked items are mandatory. Please contact service provider for detail.

Step 4: Line status shows "Registered" when the SIP account is registered successfully.
